📍 Mumbai, Maharashtra, India

SUMMARY

Over 1.5 years of experience as a Software Developer based in Mumbai. Skilled in building scalable and efficient software applications using Python, Flask, Django, PostgreSQL, SQLAlchemy, REST API, and Angular.

EXPERIENCE

Software Developer

Leewayzon

📅 06/2023 - Present   📍 Mumbai, Maharashtra, India

- Developed multiple products using Python, Flask, PostgreSQL, and REST API technologies and integrating Angular frontend.
- Utilized Docker for containerization, ensuring consistent and scalable deployment of applications.
- Collaborated with cross-functional teams to gather requirements, design solutions, and implement features.
- Employed version control systems like Git to manage codebase and streamline collaborative development processes.
- Conducted thorough testing and debugging to ensure product quality and resolve any issues promptly.

Python Developer Intern

Leewayzon

📅 01/2023 - 06/2023   📍 Mumbai, Maharashtra, India

- Developed proficiency in Python, Flask, PostgreSQL, REST API, Angular, Docker, Jira, and GitHub through internship experience
- Utilized Jira for project management, tracking tasks, and ensuring timely completion of deliverables.
- Actively participated in code reviews, version control, and collaborative development workflows using Git and GitHub.

EDUCATION

Bachelor of Science in Information Technology.

Mumbai University

📅 2021 - 2024

HSC (12th)

Maharashtra State Board of Secondary and Higher Secondary Education

📅 2021

SSC (10th)

Maharashtra State Board of Secondary and Higher Secondary Education

📅 2019

SKILLS

| Python | Flask | Django | MySQL | PostgreSQL | SQLite |

| SQLAlchemy | Rest API | Docker | Git | Github |

| Ngnix | Gunicorn | OpenCv | HTML | CSS | JavaScript |

| Bootstrap |

PROJECTS

LMS Portal (Learning Management System)

- Developed APIs for password management, including forget password and change password functionalities, enhancing user account security and accessibility.
- Implemented models and CRUD operations for courses, chapters, and topics, enabling efficient content management within the system.
- Created APIs for fetching topics and chapters, improving user experience by providing easy access to course materials.
- Developed user management APIs to fetch and count users based on their roles, facilitating streamlined user administration for administrators and students.

Paper Setter

- Developed a comprehensive model for managing student groups, implementing full CRUD (Create, Read, Update, Delete) operations for efficient student data handling
- Designed and implemented an API for the deletion of existing NEET question papers, ensuring secure and efficient removal of outdated or unnecessary papers.
- Collaborated with the development team to ensure seamless integration of new features, enhancing the overall functionality and user experience of the Paper Setter platform.

Personalize Notebook | Task Manager

- Secure login and logout for users, ensuring data privacy.
- Users can create, view, and delete their personal notes.
- Users' notes are private; only the admin can view all notes.
- Task Manager application built using Flask.
- Allows users to effortlessly manage Todo Task List.
- Features intuitive interface for adding, viewing, editing, and deleting Todo Task.
- Simplifies organization and productivity by providing streamlined task management.

VOLUNTEERING

Python Mentor

Mumbai Coding Club

📅 2023 - Present

- Volunteering as a Python Mentor at Mumbai Coding Club, teaching Python, Flask, Django, MySQL, Git/GitHub, and soft skills.
